

Listing On Billionaire Network

To list anything you have for sale on the Billionaire Network is completely free, easy to do but does have some requirements that if not provided we will pass on pushing it out to the members.

1. Images, we require a minimum of 3 quality images preferably with the dimensions of 1000px X 1000px
2. If the listing is going to be in the 100% Off Market category then please supply 1 generic image that relates to what is being sold
3. Detail, we need as much specific detail as possible because this only benefits you as the seller. Most items being sold on the Network are the ones with the most detail being provided at the point of being advertised.

Commodities

Please only contact us with commodities for sale if you actually have the product, not that you can get it, but you physically have it there and then.

This is also the same for buyers of commodities, unless you have the actual crypto or cash to buy there and then try somewhere else, please no SBLC's or MT-MUMBOJUMBO here.

Mandates

We will list items for you if you are not a mandated broker/agent but when buyers or sellers come to us interested in your listing we do tell them this is being listed by someone who has no mandate to do so and has no authority provided by the actual owner.

If you are unmandated and require a possible buyer to send you an LOI and POF directly to you (an unknown) we always advise our clients not to do this.

If you are next to the seller or buyer then get yourself a mandate because if you can't.....
